

TERRAZZÖ CAST COLOR CHART

Terrazzö Cast is a 1/8" high-build, semi-self-leveling epoxy flooring system that cures to a seamless, polished fine-grain stone look. The micro-speck pattern reads like modern granite from a distance and reveals tight, uniform detail up close. Install over a suitably colored primer for accurate tone. (**NOTE:** Carbon and Sahara include small glitter specks in the finished color.)

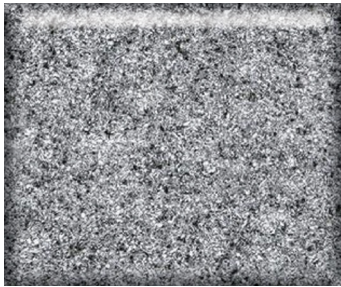

Truffle

Sahara

Ivory

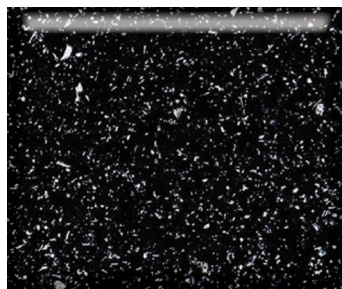

Granite

Platinum

Marble Dust

Carbon

Polaris

Please Note: Colors shown are reproduced as closely as possible. Due to screen, print, and lighting variations, always review physical samples for the most accurate representation. Color may vary by batch, kit, substrate, and application technique; create and approve a jobsite mock-up before installation.
